TO WHOM IT CONCERNS:

I want to express My deep concern about the fact that consumers not only need to know if food has been irradiated, but We have the right to know. All procedures, genetic manipulation, irradiation, origin of the food, etc., all of these, and more I am sure, need to be labeled on the packaging of the food, food products, and byproducts. As consumers, We have the right to know what has been done to the food, and where the food originated from. Thank You for your time concerning this matter.
